PROFESSIONAL SUMMARY

AI/ML engineering student (B.E., Dayananda Sagar University, 2027) with hands-on experience building and deploying end-to-end machine learning systems. Built a production RAG pipeline for legal query assistance and trained a Random Forest classification model for clinical risk prediction. IBM-certified in cloud AI. Seeking an AI/ML internship to contribute to model development, LLM integration, or applied AI research with exposure to deep learning, NLP, and computer vision applications.

TECHNICAL SKILLS

AI & Machine Learning: Supervised learning, classification, Random Forest, RAG, LLM integration, prompt engineering, vector embeddings, semantic search, feature engineering, deep learning fundamentals, NLP, computer vision

Frameworks & Libraries: scikit-learn, LangChain, IBM Watsonx AI, Pandas, NumPy, Flask, Streamlit, REST APIs

Languages: Python, Java, C, C++

Cloud & DevOps: IBM Cloud, AWS, Oracle Cloud Infrastructure (OCI), Git, Linux

Databases: MongoDB, MySQL, Supabase, vector databases

Soft Skills: Research Mindset, Analytical Thinking, Continuous Learning, Problem Solving, Leadership

EXPERIENCE

AI/ML Trainee

Jul 2025 – Aug 2025

IBM SkillsBuild for Academia

Remote

- Completed structured training in ML, deep learning, and cloud computing; built and deployed AI applications using IBM Watsonx APIs on IBM Cloud.
- Researched generative models and cloud inference techniques; presented findings to a 50+ member program cohort.

Stage Operations Lead (CPA)

Aug 2024 – Present

Dayananda Sagar University

Bengaluru, India

- Coordinated logistics and technical requirements across multiple large-scale university events, managing cross-functional teams end-to-end.
- Liaised between internal teams and external partners as primary point of contact, strengthening stakeholder communication and project ownership.

PROJECTS

Adaptive RL Trading System — Nifty 50 | *PyTorch, PPO, FastAPI, React* | GitHub

2026

- Built an end-to-end PPO-based reinforcement learning trading system for Nifty 50 stocks using PyTorch and Stable-Baselines3; achieved a backtested Sharpe Ratio of ~2.45 and 58%+ win rate on 2025 test data.
- Engineered a 20+ feature pipeline combining technical indicators (RSI, MACD, Bollinger Bands), VADER sentiment scores from financial news APIs, and Gaussian HMM for Bull/Bear/Sideways regime detection.
- Built a FastAPI backend with parallel processing (60% latency reduction, <3s response) and a React/TypeScript dashboard to visualize trading signals and backtest metrics.

Legal RAG Assistant | *Python, LangChain, OpenAI API (GPT-4, text-embedding-3-large)* | GitHub

Nov 2025

- Built a Retrieval-Augmented Generation system to parse complex legal documents and answer specialized legal queries with context-aware, hallucination-reduced LLM responses.
- Designed a chunking strategy of 512–1,024 tokens with 25% overlap to preserve legal context across document splits; indexed embeddings in a FAISS vector database for fast semantic retrieval.
- Used text-embedding-3-large for dense retrieval, sustaining high precision on queries averaging 4,000–7,500 input tokens while keeping vector-search latency minimal.

Maternal Health Risk Prediction App | *Python, scikit-learn, Pandas, Streamlit* | GitHub

Aug 2025

- Built an end-to-end ML app to classify maternal health risk (High/Medium/Low) from clinical vitals, deployed via Streamlit.
- Trained and benchmarked Logistic Regression, KNN, Gradient Boosting, and Random Forest classifiers; engineered features and tuned hyperparameters to correct class imbalance.
- Selected Random Forest as final model, achieving 88.2% accuracy with high precision/recall/F1 tailored for clinically reliable risk stratification.

EDUCATION

Dayananda Sagar University

Sep 2023 – Jun 2027

B.E. in Artificial Intelligence and Machine Learning

Bengaluru, Karnataka

Krupanidhi Pre-University College

Jun 2021 – Apr 2023

Pre-University (PCMC)

Bengaluru, Karnataka

CERTIFICATIONS

IBM Certified — Artificial Intelligence and Cloud Computing (IBM SkillsBuild, 2025)

University of Pennsylvania (Wharton Online) — Application of AI, InsurTech, and Real Estate Technology (Coursera, 2026)

LANGUAGES

English (Professional), Hindi, Kannada, Telugu
